

PREPARE ENRICH[®]

PRE-ADOPTION/PRE-FOSTER CARE

“A stable, healthy environment is crucial for raising children of any age.”

This assessment will be taken online at the comfort of your home. We recommend with couples that each member take the test individually. The purpose is to help know the underlying dynamics of the relationship and prepare them to adopt or foster a child. Couple’s assumptions about the journey and how the addition of a child will impact the home and connection is paramount. We challenge couples assumption that a child will bring excitement and fill their home with love without regard for how the change will test our relationships.

1. Identify Healthy Couples

While no relationship is perfect, it is crucial to place children in homes with healthy role models and stable relationships. PREPARE/ENRICH provides a wealth of information on each, their relationship, and their background.

2. Prepare Prospective Parents

The Pre-Adoption/Pre-Foster Care assessment version is specifically designed to identify unrealistic expectations and create opportunities for healthy dialogue as couples prepare to bring an adopted/foster child into their family system.

3. Trust the Results

The items and scales in the inventory are statistically valid and reliable. Percentage scores based on comparisons with a norm group of over 50,000 couples. This assessment allows you and the couple to move forward in the process confidently.

Coaching to Impact offers these assessments every quarter. Our next group will begin in September. [Please contact us](#) and move down to the schedule button to discuss your interest by scheduling an appointment for a 30-minute call and obtain additional information.
